

- MANCHESTER SECONDARY PRU CASE STUDY -

ABOUT THE CLIENT

Manchester Secondary PRU is an not-for-profit established Pupil Referral Unity which operates as part of the wider City of Manchester Learning Partnership with Bridgelea Primary School. The organisation provides education to vulnerable young people in Manchester who are not able to access it as easily.

THE SITUATION

- The organisation needed to provide mobile connectivity to their students, but a lack of controls led to unpredictable and very high bills for data usage.
- Their current phone account and system was in need of ongoing management and maintenance to keep communication among staff strong.

THE CLIENTS WORDS

“

Words cannot express how grateful I am for AdaptiveComms - the change has been incredible!

The engineers knew exactly what to do to help our organisation and reduce our costs massively, and continue providing ongoing support whenever we need them.

George Austen
Business Manager

HOW DID WE HELP?

Manchester Secondary PRU were facing unexpected and unnecessary bills with their mobile connectivity, which they wanted to resolve as soon as possible.

Once we were made aware of the situation, AdaptiveComms helped the organisation ensure their costs were kept low and assist with their current phone systems.

We helped:

- Implemented restrictions for their mobile broadband to ensure only safe and approved sites were being visited to reduce any security risks.
- Implement a VPN (Virtual Private Network), controlling the internet access and making sure the service is only being used for it's intended purpose, protecting users. This also enabled us to limited the amount of data usage, reducing bill shock.
- We saved the company thousands by taking over their mobile phone account and phone systems and various units across Manchester.

Now the team at Manchester Secondary PRU can continue the incredible work they do for young children around Manchester!

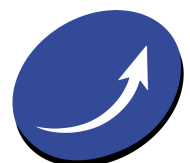

CALL US ON 01704 540 547 TO FIND OUT HOW WE CAN HELP YOU!

My team and I are here to help your business with your IT & Communications. Contact us today to find out how!
